Stay on the lookout for a whole new crop of gins with very non-traditional botanical mixes. “Flavored gins” is a bit of a misnomer, since all gins are flavored – generally with juniper, citrus peel, angelica root, cassia and the like. But now, thanks to the explosion of inventive “GinTonic” cocktails in Spain and the new expansion of less juniper-forward New American Dry Gins over the past decade, we’re seeing even more experimentation in the botanical mix.
